

CATAN EQUIPMENT SALES

March 21, 2019

Catan Equipment Sales
62 Valentine Rd.
New York, NY 10036

To Whom This May Concern,

Catan Equipment Sales (CES) is a NYC & LI Manufacturing Representative firm that has been in business for over 40 years. CES has had the privilege of working with Pete Montana and RMS for 15 years.

Over these 15 years a few of the larger projects CES has had the privilege to work with Pete on are:

- FBI Make Up Air Unit
- Cube Smart Storage
- McKeon Doors
- Stanley Steamer
- Cooper Ave/ Treasure Island
- Dark Storm Firing Range
- RIOC Bus Depot

Pete Montana has always been CES "go-to" guy for every project that we required service or a challenging repair or installation. The FBI Make Up Air Unit project is a great example of this. The FBI project - CES's manufacturer sent a Make Up Air unit that required serious in-field re-configuration & start-up. This was a very high-profile project working with the FBI and CES needed major assistance immediately. We contacted Pete Montana for assistance and his expertise. Pete immediately went to the job site, put together a resolution strategy, employed the resources necessary to make the proper changes and repair. Pete had the project completed in the time allotted and the customer was thrilled with the results.

All of our experiences with Pete Montana have been extremely positive. Pete has always acted in a manner that is extremely professional with high integrity. Pete always made sure we were paid on timely bases and have never had any financial issues.

We consider Pete to be a good friend and a great business partner.

Christopher J. Catan
Systems Engineer
