March 14, 2019

To Whom it may concern,

For the past ten years I have come to know Peter Montana as a fair and honest man. I first met Pete when I was working for LIPA's clean Energy program which was providing incentives to contractors and home owners to install high efficiency HVAC equipment. Peter was very motivated to provide this for his customers hoping they would see the value of a contractor who cares about the builders cost.

Over the years Peter and I have been involved in many projects where my office provided the load calculations prior to his firm installing the equipment. We were so busy I had to dedicate an employee to just do RMS work.

All of this came to an abrupt end in the fall of 2018. I had no idea why and just assumed they were not in need of our services. I also did not give it much thought because of our relationship. Until my accounts receivable department also noticed payments for outstanding work had stopped. When AR called to inquire about this, we were given a run around but never where we told that Peter no longer worked there. Our conversations would not have been so polite.

All in all, Peter is still a stand-up guy and we will both move on from RMS Unfortunately for Pete this was the company he founded, I can only wish him all the best.

Sincerely,

Glenn LaMay

President , Home Energy Solutions Inc.
